

Terramor Resort Traffic

A Nightmare Scenario

Terramor could generate up to 25,000 additional vehicle trips* from May to November, exacerbating dangerous intersections and traffic volume in YOUR neighborhood.

Overlook Mountain's popular appeal could worsen this problem on Glasco Turnpike and Meads Mountain Road.

The accident rate at nearby Shultis Corners at 212 and Glasco Turnpike is already FIVE TIMES the NY State average.

Plochmann Lane could become a major traffic alternative, endangering pedestrians, bicyclists and residential calm.

The safety of the Woodstock Jewish Congregation and Woodstock Day School will also be impacted.

Additional traffic at the Village Green could create a significant increase in already frustrating traffic congestion.
